willful ignorance

willful ignorance

RMA--Ethical Decision-making

Ensuring Ethical Behavior

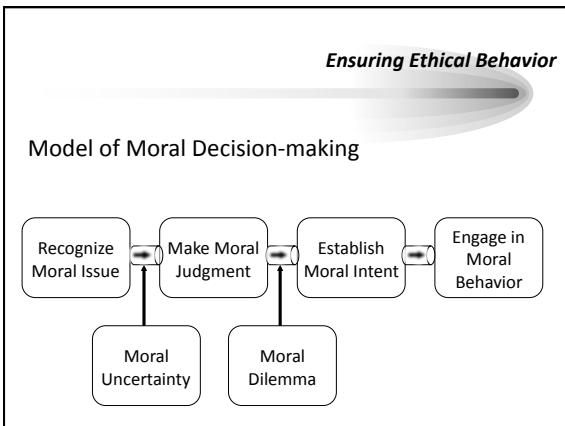

- Ethical dilemmas “are situations arising when equally compelling ethical reasons both for and against a particular course of action are recognized and a decision must be made...”
 - (CNA, 2002, p. 5).
- Ethical distress, on the other hand, occurs when a decision is made regarding what one believes to be the right course of action, but barriers prevent the nurse from carrying out or completing the action.

Ensuring Ethical Behavior

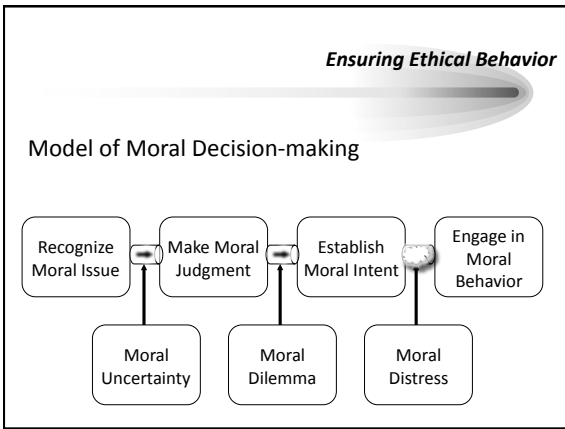

- *Test of moral dilemma:*
 - consider a time when you felt uncomfortable with having to make a decision—
because you didn't seem to have any 'good' options available.

Ensuring Ethical Behavior

- There is a distinct difference between an ethical dilemma and ethical distress...
- **Ethical or moral** distress arises when one is unable to act on one's **ethical** choices, when constraints interfere with acting in the way one believes to be right.

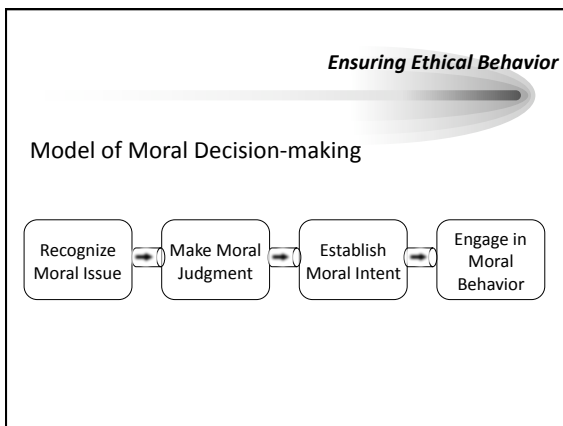

Ensuring Ethical Behavior

- **Test of moral distress:**
 - consider a time when you felt uncomfortable—
with having to implement an organizational decision or policy.

- Daedelus and Icarus

Ensuring Ethical Behavior

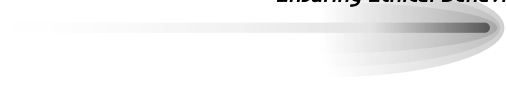

- To escape, Daedalus built wings for himself and Icarus, fashioned with feathers held together with wax. Daedalus warned his son not to fly too close to the sun, as it would melt his wings, and not too close to the sea, as it would dampen them and make it hard to fly.
- They successfully flew from Crete, but Icarus grew exhilarated by the thrill of flying and began getting careless. Flying too close to the sun god Helios, the wax holding together his wings melted from the heat and he fell to his death, drowning in the sea.
