Fermat   Euler   Lagrange   Legendre   Gauss
Fermat

- Pierre de Fermat (1607–1665)
• Pierre de Fermat (1607–1665)
• Born to a wealthy family; father was leather merchant
Fermat

- Pierre de Fermat (1607–1665)
- Born to a wealthy family; father was leather merchant
- Worked as a lawyer; mathematics was his hobby
Pierre de Fermat (1607–1665)

- Born to a wealthy family; father was a leather merchant
- Worked as a lawyer; mathematics was his hobby
- Fermat’s little theorem; Fermat’s last theorem; Fermat primes; Fermat’s two squares theorem
- Pierre de Fermat (1607–1665)
- Born to a wealthy family; father was leather merchant
- Worked as a lawyer; mathematics was his hobby
- Fermat’s little theorem; Fermat’s last theorem; Fermat primes; Fermat’s two squares theorem
- Also known for: Fermat’s principle in optics; work in analytic geometry and probability theory
Pierre de Fermat (1607–1665)
- Born to a wealthy family; father was leather merchant
- Worked as a lawyer; mathematics was his hobby
- Fermat's little theorem; Fermat's last theorem; Fermat primes; Fermat's two squares theorem
- Also known for: Fermat's principle in optics; work in analytic geometry and probability theory
- Married Louise de Long; 8 children, 5 of whom survived to adulthood
Leonhard Euler (1707–1783)

- Born in Basel, Switzerland; father was Protestant minister
- Worked as a mathematician in St. Petersburg and Berlin; totally blind after 1771
- Euler's phi-function; Euler's theorem; characterization of even perfect numbers; Euler's criterion
- Also known for: work in analytic geometry, analysis, calculus of variations, mechanics
- Married Katharina Gsell; 13 children, 5 survived to adulthood; after Katharina's death, married Salome Gsell
Leonhard Euler (1707–1783)
- Born in Basel, Switzerland; father was Protestant minister

- Also known for: work in analytic geometry, analysis, calculus of variations, mechanics
- Married Katharina Gsell; 13 children, 5 survived to adulthood; after Katharina’s death, married Salome Gsell
Joseph-Louis Lagrange (1736–1813)

Born in Turin, Italy; family was influential and well-connected, but not wealthy

Worked as a mathematician in Turin, Berlin and Paris

Wilson’s theorem; Pell’s equation; theorem on polynomial congruences; four squares theorem

Also known for: work in analysis, calculus of variations, theory of equations, mechanics

Married Vittoria Conti; no children; after Vittoria’s death, married Renée-Francoise-Adélaide Le Monnier
• Joseph-Louis Lagrange (1736–1813)
• Born in Turin, Italy; family was influential and well-connected, but not wealthy
Joseph-Louis Lagrange (1736–1813)
• Born in Turin, Italy; family was influential and well-connected, but not wealthy
• Worked as a mathematician in Turin, Berlin and Paris

Wilson’s theorem; Pell’s equation; theorem on polynomial congruences; four squares theorem
Also known for: work in analysis, calculus of variations, theory of equations, mechanics
Married Vittoria Conti; no children; after Vittoria’s death, married Renée-Françoise-Adélaide Le Monnier
Fermat  Euler  Lagrange  Legendre  Gauss

- Adrien-Marie Legendre (1752–1833)

- Born in Paris to a wealthy family; worked in Paris all his life
- *Essai sur la Théorie des Nombres* (1808)
- Legendre symbol; three squares theorem
- Also known for: *Éléments de Géométrie*; Legendre polynomials; work in elliptic functions and mechanics
- Married Marguerite-Claudine Couhin after losing his fortune in the French Revolution
• Adrien-Marie Legendre (1752–1833)
• Born in Paris to a wealthy family; worked in Paris all his life
Adrien-Marie Legendre (1752–1833)
Born in Paris to a wealthy family; worked in Paris all his life
*Essai sur la Théorie des Nombres* (1808)
Adrien-Marie Legendre (1752–1833)
Born in Paris to a wealthy family; worked in Paris all his life
*Essai sur la Théorie des Nombres* (1808)
Legendre symbol; three squares theorem
### Adrien-Marie Legendre (1752–1833)
- Born in Paris to a wealthy family; worked in Paris all his life

- Legendre symbol; three squares theorem
- Also known for: *Éléments de Géométrie*; Legendre polynomials; work in elliptic functions and mechanics
- Married Marguerite-Claudine Couhin after losing his fortune in the French Revolution
Carl Friedrich Gauss (1777–1855)

- Born in Brunswick to poor, working-class parents; worked in Germany all his life
- *Disquisitiones Arithmeticae* (1801)
  - Congruence notation; quadratic reciprocity law; primitive root theorem
- Also known for: work in linear algebra, analysis, differential geometry, statistics, astronomy, potential theory
- Married Johanna Ostoff; 3 children; after Johanna's death, married Minna Waldeck; 3 children
• Carl Friedrich Gauss (1777–1855)
• Born in Brunswick to poor, working-class parents; worked in Germany all his life
- Carl Friedrich Gauss (1777–1855)
- Born in Brunswick to poor, working-class parents; worked in Germany all his life
- *Disquisitiones Arithmeticae* (1801)
